Profile Summary

Software Developer with 3+ years of experience in full-stack .NET development using ASP.NET Core Web API, ASP.NET MVC, SQL Server, and JavaScript. Skilled in building secure REST APIs with Repository Pattern and Service Layer architecture, integrating SQL Server stored procedures, and implementing real-time features via SignalR across HRMS and healthcare enterprise applications on Microsoft Azure.

Technical Skills

Languages: C#, JavaScript, SQL, HTML, CSS
Frameworks: ASP.NET Core Web API, ASP.NET MVC (Razor Views), Entity Framework, Vue.js, SignalR
Architecture & Patterns: Repository Pattern, Service Layer, Dependency Injection, RESTful APIs, Separated Frontend/Backend Architecture, Monolithic, Microservices
Cloud Platforms: Microsoft Azure (App Services, Functions, Storage, Service Bus, Containers)
Database Technologies: SQL Server, Stored Procedures, Query Optimization, Indexing
Tools: Visual Studio, VS Code, Postman, Swagger, SSMS
Concepts & Compliance: HIPAA Compliance, PHI Security, LINQ, Real-time Communication

Experience

Software Developer October 2025 – Present
Bhavitha Tech *Banglore, Karnataka*

- Engineered backend REST APIs for HRMS Disciplinary Action and Promotion modules using ASP.NET Core Web API, following Repository Pattern and Service Layer architecture with Dependency Injection.
- Built server-rendered frontend using ASP.NET MVC with a dedicated MVC Controller layer calling backend APIs over HTTP; integrated SQL Server stored procedures for pagination, sorting, and workflow operations.

Associate Software Developer March 2023 – September 2025
Heaptrace Technology Pvt. Ltd. *Pune, Maharashtra*

- Designed and developed scalable REST APIs using ASP.NET Core Web API for a healthcare adherence platform managing 50,000+ patient records.
- Improved API response time by 40% by optimizing SQL joins, indexing strategies, and LINQ expressions.
- Developed dynamic frontend features using Vue.js for order management and inventory dashboards, enhancing UI responsiveness.

Projects

Human Resource Management System (HRMS) October 2025 – Present

- Worked on HRMS modules including Disciplinary Action and Promotion, developing backend APIs using ASP.NET Core Web API and SQL Server stored procedures.
- Developed server-rendered frontend using ASP.NET MVC (Razor Views) with dedicated MVC Controllers calling backend APIs over HTTP, supporting role-based workflow, pagination, and sorting.

Enterprise Healthcare Platform April 2023 – September 2025

- Built HIPAA-compliant REST APIs using ASP.NET Core Web API for medication adherence tracking, patient workflow management, and healthcare operational processing across 50,000+ patient records.
- Developed Vue.js dashboards with SignalR real-time updates and implemented PDC calculation workflows using SQL Server stored procedures and Azure Timer Trigger Functions, improving API/database performance by 40%.

Order Management System July 2024 – March 2025

- Developed RESTful APIs using ASP.NET Core Web API to support order lifecycle operations: creation, update, assignment, and delivery status.
- Replaced a Cron-based polling system with SignalR for real-time order updates, significantly improving kitchen response time and user experience.

Education

Shri Shankaracharya Technical Campus Bhilai, Chhattisgarh
Bachelor of Technology in Computer Science *July 2019 – June 2023*
